Concrete Float Modules – SAR Facility Site Work in Hartley Bay, BC

Request for Information (RFI) F1700-195546/A

www.pspc-spac.gc.ca

Background

- The Canadian Coast Guard (CCG), a Special Operating Agency within the Department of Fisheries and Oceans, is opening a new Search & Rescue (SAR) Station in the remote area of Hartley Bay, BC.
- The Gitga'at First Nations community of Hartley Bay, BC is located on the central coast of British Columbia at the mouth of Douglas Channel, about 630 kilometres (390 mi) north of Vancouver and 145 kilometres (90 mi) south of Prince Rupert. It is an isolated village accessible only by air and water with a population of approximately 200.

Description of the Work

- A contract has been awarded for some of the building components of the SAR facility in Hartley Bay. This RFI relates to subsequent marine site work that is required, to begin in June 2020.
- The site work will include:
 - Installation of 17x52m concrete float supporting a modular CCG SAR Station, moored by two 762mm steel piles. Float is owner supplied and must be towed by contractor from Steveston, BC.
 - Installation of a 17x52m concrete breakwater float, moored by fourteen synthetic mooring lines. Float is owner supplied and must be towed by contractor from Steveston, BC.
 - Rehabilitation and replacement of a three High Density Polyethylene (HDPE) pipe breakwater.
 - Supply and install a 20m aluminum gangway for access to SAR Station float.

Question #1

- Do you own or operate a company or Joint Venture? If so, please provide a list of the skills and equipment you offer. Please include a description of your company or joint venture including a brief history of work and/or project(s) completed within the last 10 years (if any).

Question #2

- For prime contractors considering this opportunity, how could you work with sub-contractors, labour, training, (e.g. apprenticeships), material, goods, equipment and services available from the Local First Nations? How would your company organize and manage this?

Question #3

- For both indigenous people and industry members, have you previously encountered incentive strategies that encouraged different methods of engagement and contracting with First Nations? Did any of these result in delivering skills development for indigenous people, increasing industrial capacity for First Nations owned businesses and providing substantiated economic benefits to the local First Nations? If yes, what were the results? If no, why?

Question #4

- Canada aims to include benefits in the areas of subcontracting, provision of goods and services, skills development and training, direct labour, and other measures. What other measures do you think would provide benefit and be acceptable to local First Nations?

Question #5

- Canada can use point-rated criteria or use mandatory criteria in the request for Indigenous Benefits Plan (IBP) in the solicitation. Which of these approaches do you recommend for incorporating procurement measures benefiting the local First Nations for this project?

Question #6

- Does a requirement for an Indigenous Benefits Plan (IBP) impact your decision to participate in this procurement?

Question #7

- One of the indigenous procurement measures implemented for this procurement may be to ensure that a minimum percentage of subcontracting consist of diverse suppliers, which in this case would be focused toward the local First Nations. What percentage of subcontracting with diverse suppliers might be achievable? For example, one approach could be to include a rated criterion in the RFP to award 5-15% of the total technical score on the basis of subcontracting to diverse suppliers. A diverse supplier is currently being defined as a business owned or led by Canadians from underrepresented groups, such as, Indigenous Peoples.

Question #8

- PSPC is considering various models to confirm that a supplier meets the definition of a diverse supplier. One option is that suppliers self-certify with an attestation, which would be verified by PSPC through audits throughout the life of the contract. Should PSPC use attestation (self-certification) followed by audits, or certification by established certification organizations to qualify diverse suppliers? What other methods would you propose we use to verify diverse suppliers? A second option is to make use of third party organizations which verify that suppliers meet the diverse supplier definition and provide a certification for a fee.

Question #8 continued ...
