## r51176 Q\&A 3

Q1: Annex A, 2.4 states that the electrical systems and components should meet CAN/CSA C22.2 No. 203, and 4.1 .7 states the tables must have a power cord that is a minimum of $108^{\prime \prime}$ in length. CAN/CSA C22.2 No. 203 states that a power cord should be no longer than $70.86^{\prime \prime}$ in length. 4.1 .7 seems to contradict 2.4 , can you please clarify?

A1: Replace CAN/CSA C22.2 No. 203 by The electric height adjustable base must be certified to be compliant with CSA C22.2 No.68-9 and UL962.

Q2: Can you please further explain what is meant by "metal-to-metal connection in 4.1.5? Does this mean the work surfaces need metal threaded inserts for metal bolts to screw into?

A2: Not for the surfaces, need metal threaded inserts for metal bolts to screw into for the height adjustable base.
