The following questions have been submitted by a potential Bidder:

Regarding the subject solicitation would you please clarify following questions:

With reference to Annex A item A1,

The potential bidder is to propose a system which will be tested and inspected completely according to Canadian regulations and will come with CSA label. This label Indicates that the electrical product is tested and complies with product standards, local installation codes, and the requirements of the National Fire Protection Association. CSA will ensure the safety of your employees and we will completely explain foreseeable hazards in the work place and the information, instruction, training and supervision necessary to protect their health and safety. Therefore, the offer includes any modifications necessary to ensure compliance with the electrical code and Canadian labour regulations.

In addition, some of the required NFPA codes such as 85, 86, and 86C is not applicable to this system and they are applicable to ovens , furnaces and Boilers.

Considering the fact that there is no manufacturer in the market which can comply with the requested NFPA requirements and the system must be delivered before end of the march 2020, We would like to kindly request to remove A1-2 & A1-3 from Annex A.

Answer: Yes, we will remove A1-2 and A1-3 from Annex A.
