**This amendment is raised to answer the following questions:**

**Question:**

1. Section 6.2.2 Ordering Process, states:

- a. in 6.2.2 (2) : In situations where an EM device is required immediately, the CSC Project Authority will follow the same process, but will identify the order as urgent in the e-mail.

If a unit is shipped but then is not required by the time it is delivered and a request for its return follows immediately, then it appears the Contractor will not be allowed to charge the daily rate, or at most only one business day. Please confirm.

**Answer:**

The contractor may recover their actual shipping costs if CSC cancels an order for a device once it has shipped and the device is not utilized (meaning a daily rate has not been initiated).

---

**Question:**

In the Solicitation Amendment #3 issued earlier this week, it appears that replacement costs for equipment (lost or damaged) and costs for consumable items are to be included in the bid response, but these will not be evaluated at all ("Not used in proposal evaluation"). Theoretically, if a bidder proposes a daily price of \$0.00 per device (with the goal of obtaining the maximum score for pricing) and a replacement price of \$1M per device lost and \$50,000 per consumable item (these prices are not evaluated), will this be considered by CSC as an acceptable bid response, and would CSC be bound to adhere to all of these figures if a contract was awarded? These figures are fabricated for illustration however, if such a pricing approach is not acceptable, please provide additional information.

**Answer:**

In the Statement of Work (Annex A) section 6.2.1 General, item 7, it is stated that the contractor must provide two straps with every device at no additional cost, if the straps are consumable in nature. Therefore, the cost of consumables are taken into account in the rated daily rate. However, we encourage companies to submit, if they wish, a list of MSRP for their components. While these will not be rated, they may carry over into the contract and will be negotiated on a case by case basis. The expectation is that contractors provide fair market values in their submission.

---

**Question:**

For the pricing, we are wondering if this is a mistake in the document. Because when you add all of the 15 lines it creates an unreal number.

**Answer:**

Please refer to updated pricing schedule attached.

**OPTION – DATA MIGRATION** (not used in proposal evaluation)

Is a data migration service available: \_\_\_yes \_\_\_no

\_\_\_\_\_ hours \$ \_\_\_\_\_ per hour

The respondent is requested to state whether they are able to provide data migration services of the existing CSC inclusion and exclusion zones. CSC has approximately 25 000 zones available in shapefile (.shp, .shx, dbf). Shapefile is a geospatial vector data for geographic information system (GIS) software. We would require the vendor to conduct an assessment of the number of features, which will require geocoding/georeferencing and delineation of administrative boundaries. This work would be completed in point, line or polygon format (as appropriate) with an output of one or more feature classes to be stored within one or more geodatabases, depending on the respondent's proposed architecture. If the respondent is able to provide this service, they are requested to provide an estimate in time (hours) to complete this exercise as well as an estimate of the associated cost (hourly rate).

**MISCELLANEOUS COSTS** (Not used in proposal evaluation)

Supplier is requested to include their proposed list of itemized unit costs and prices for potential equipment replacements and repairs that may be incurred during performance of monitoring work.
