This Solicitation Amendment No. six (6) is raised to include the following addendum no. 6.

The following addendum to the tender documents is effective immediately. This addendum shall form part of the contract documents. All other terms and conditions remain the same.

Addendum No. 006.

Title: Fundy Pool Bathhouse Rehabilitation – Fundy Park, NB

Questions and Answers:

- Q: In regards to the window sashes we cannot find what paint to use, calling for oil based paint that is no longer available.
A: The linseed oil paint as specified in the standard of acceptance is available from specialty paint suppliers. Please price as specified.
- Q: We suggest removing the full mortar bed as during the chipping of tile most of this will be damaged and are worried that all will have to be replaced. Please clarify what you want to have done.
A: We will not be changing our approach at this time. Please price as designed/ specified.
- Q: For the wall tile we understand not wanting to choose a colour but a size and shape is needed in order to price this piece of work as this greatly effect cost of material and labour to install.
A: Please refer to Addendum 02.
- Q: For heritage doors and windows is there any further information that can be given of the original materials used.
A: There are no records or information available on the original materials at this time.
- Q: We suggest using a stainless steel ring nail for roofing purposes as this will give you a much longer life span.
A: Please price as specified.
- Q: For the door going into the basement are we to allow for any cost for fixing the concrete as it is severely cracked and could be further damaged by removing the frame.
A: This will be addressed in a future phase of work. Please price as designed.
- Q: Are we to fix any of the mortar joint on the exterior stone or the cracked concrete in various locations.
A: This will be addressed in a future phase of work. Please price as designed.

- Q: Where to do the hangers of the basement equipment attach to and will replacement need to occur for these locations. We also noticed that the spacing of the hangers would probably not meet code requirements.
A: Please refer to Detail 2, M-1 Ventilation Drawing for information on methods and extent of equipment to be hung.
- Q: In what shape is the Structural steel and should we allow for any misc. metal repairs?
A: Condition unknown and not in the scope work.
- Q: Are we to allow for fire collars at locations where penetrations through the slab occur or is just firestopping sufficient?
A: Please refer to the requirements outlined in section 07 8400, part 1.5 of the specification.
- Q: Is there any finish on the OWSJ which would require additional work in order to properly fireproof?
A: Unknown at this time. Fireproofing to be installed per the requirements of the manufacturer.
- Q: Do we have to fill any voids where electrical and plumbing has penetrated the electrical room?
A: No.
- Q: The door in the electrical room would not meet current fire code standards should we allow for replacement of this door?
A: No. This door is heritage and not in the scope of work.

- Q: Do we have too actively heat the building throughout construction or does this only have to be done as we require?
A: All products to be installed per manufacturers requirements. Heating requirements to suit.
- Q: On drawing A-4 finish schedule two types of ep[ox]y are listed EF 01 epoxy floor and EF 02 epoxy non slip but drawing A11 has an added type EF 03 with no added information on type. Please clarify.
A: EF 03 indicates locations of a secondary non-slip colour.
- Q: What is the Species of the wood frames and is it possible to have a detail relating to this piece of work?
A: Species of wood is unknown, no records exist.
