**This solicitation amendment 001 is issued to:****Part 1** - Answer the questions from the Industry**Part 2** - Extend the Solicitation Closing Date.

---

**Part 1**

## Answers to Questions from the Industry

| Number | Question   | Response  |
|--------|--|---|
| 1      | ESDC has identified a requirement for a SaaS solution in this RFP, with substantial amounts evidence required to meet these requirements which is prohibitive for products that could otherwise meet the requirements outlined in this RFP. For products to provide this evidence without it already in place, there would be a substantial level of effort and cost, limiting proposals on this RFP. Since Shared Services Canada (SSC) has cloud infrastructure available for Government of Canada programs that would meet all ESDC requirements to protect confidentiality, integrity and availability within a PBMM environment, would the crown consider responses to this RFP where the solution was hosted by Shared Services Canada's cloud offering instead of by the bidder? This option would allow for submissions of appropriate products at a more reasonable cost to ESDC, while still meeting all product, service and data requirements. | <p>The Crown seeks a solution that includes a full and complete stack of cloud service models (SaaS, Paas, IaaS) provided by the Bidder.</p> <p>For the Bidders that don't have in place the evidence of a full compliance with the PBMM requirements, the Crown encourages them to partner with a cloud service provider that has that evidence.</p> <p>Such cloud service providers have had the evidence validated by having completed the Canadian Centre for Cyber Security's (CCCS) "Cloud Service Provider IT Security Assessment Process" (for the IaaS and PaaS service layers).</p> |

|   |   |   |
|---|---|---|
| 2 | <p>The RFP states that there are approximately 30,000 employees and four main user groups of approximately 3,000 within ESDC. Shall we make mass notifications available to all employees (severe weather/threats) in a certain geographical location) then focus other roles/limitations for the four user groups and 3,000 approximate employees (20 and 2980)?</p>   | <p>Yes, only the alert communication (or mass notifications) part of the delivery would pertain to all employees (approx. 30,000).</p> <p>The other roles/limitations would apply to the four groups that make up to 3,000 main users, who would use most parts of the application. One of those groups are the 20 users in the Administrator role.</p> |
| 3 | <p>The below paragraph states potentially making this system available for any department or Crown Corp, would this simply be to facilitate future procurement by these entities who may purchase independently if needed? Any clarification would help.</p> <p>ESDC is the Initial Client that will use the EMAS (the "Software as a Service Solution"). However, this bid solicitation will also allow Canada to make the Software as a Service Solution available to any department or Crown corporation (as those terms are defined in the Financial Administration Act) or any other party for which the Department of Public Service and Procurement Canada is authorized to act from time to time under section 16 of the Department of Public Works and Government Services Act (each a "Client"). Although Canada may make the Software as a Service Solution available to any or all the Clients, this bid solicitation does not preclude Canada from using another method of supply for entities of the Government of Canada with the same or similar needs.</p> | <p>Correct. Other departments or Crown corporations can use this agreement to acquire their own EMAS solution, with the same terms and conditions.</p>  |
| 4 | <p>Given that there are over 100 combined mandatory and rated requirements for this solicitation, we would like to respectfully request a two (2) week extension to the submission deadline to provide sufficient time to meet the criteria.</p>  | <p>The Crown and ESDC agrees to a two (2) week (i.e. 14 calendar days) extension to the submission deadline.</p>  |
