Solicitation Amendment 001 is issued to respond to bidder's questions.

Question 1:

The boat that we propose has a certificate from KR which is an approved RO by Transport Canada. Hence is it mandatory to obtain the letter from DNV GL stating that the boat complies with their requirements? Is an alternate letter from the Original Equipment Manufacturer in lieu of the DNV GL letter accepted?

Answer 1:

When it comes to approvals, it is incumbent on suppliers to show objective evidence that the equipment they intend to offer is accepted by TC – either directly with a type approval certificate which has TC notation on it, or through a letter from DNV-GL as the vessel's class, or through an MTRB decision.

The "Type Approval Certification to the Marine Equipment Directive (MED) on Canadian Vessels" attached provides direction for suppliers regarding certification. Certificates/letters must be submitted for a MTRB decision for marine equipment to be used in Canadian vessels.

Further guidance information can be found in TP 14612 as per the following:

<https://www.tc.gc.ca/eng/marinesafety/tp-tp14612-menu-4477.html>

Type Approval Certification to the Marine Equipment Directive (MED) on Canadian Vessels

This notice serves to clarify Transport Canada's (TC) direction in relation to life saving appliances and fire safety systems, equipment and products certified to the European Union (EU) Marine Equipment Directive (MED) when used onboard Canadian vessels.

As prescribed by regulations, marine equipment must be approved by the Minister of Transport. This allows TC to have complete oversight of the equipment's compliance with the applicable requirements. When equipment is approved by a foreign administration or one of its delegated entities such as a Notified Body under the MED, TC does not have authority over the manufacturing, testing, approval and follow-up processes as it would when approved by the Minister.

TC therefore emphasizes that compliance to the requirement is key, and every time a new build project begins or when equipment onboard a vessel has to be replaced, equipment meeting the Canadian Regulations and the approval procedures as seen in [TP14612 Procedures for Approval of Life Saving Equipment and Fire Safety Systems, Equipment and Products](#) shall be installed.

Special circumstances may occur where above conditions are impossible to meet. In this case, it is advised to contact Transport Canada through the Canadian Recognized Organization, if applicable, as early as possible in order to consider possible solutions or alternatives.

If marine equipment certified under the MED is proposed to be used onboard Canadian vessels, an MTRB decision will be required. The application must be accompanied by a *Statement of Compliance* produced by the vessel's RO confirming that the equipment meets all applicable Canadian technical requirements and is approved by an EU Notified Body that is also a Canadian RO. The *Statement of Compliance* must be accompanied by a letter from the equipment manufacturer stating that the manufacturer agrees to make available all approval-related documentation upon request by Transport Canada.

Inquiries regarding Type approval procedures can be sent to: TC.MarineTA-ATMaritime.TC@tc.gc.ca.
