This amendment is raised to address the following:

- To respond to questions received during the solicitation period; and
- To revise the solicitation accordingly, as applicable.

QUESTIONS AND ANSWERS

In regards to the Mandatory Requirements identified in section 2.2 in Annex A & C:

Q1: Sec 1.28 Must be able to internally store measurement data if there is no external data collector in use (minimum of 500 fixpoints and 10,000 measurement points)

Why is it mandatory?

A1: The device must be able to operate as a standalone with no data collector. In the event of a data collector failure, RCMP is unable to return later due to short lived evidence, highway disclosures and geographical retractions to equipment access. NO Change to this requirement.

Q2: Sec 1.29 Must have external SD card, CF card, or USB slot for data transfer

Why is it mandatory? The data is stored on the data collector.

A2: The device must be able to operate as a standalone with no data collector. NO Change to this requirement.

Q3: Sec 1.30 Must include SD memory card or USB Storage Drive (minimum of 1GB)

Why is it mandatory? The data is stored on the data collector.

A3: The device must be able to operate as a standalone with no data collector. NO Change to this requirement.

Q4: Sec 1.31 Must be able to communicate with an external data collector wirelessly via a built in radio handle

Why is it mandatory?

A4: The location of the radio is irrelevant. See revision for 1.31 below.

Q5: Sec 1.32 Must have a minimum wireless onboard data collector communication range of 800m (linear) and have a unique Bluetooth address to avoid radio interference

Why is it mandatory?

A5: The nature of the communication does not matter as long as it is stable and free of interference. See revision for 1.32 below.

Q6: Sec 1.36 Must have visible optical plummet

Why is it mandatory?

A6: Please refer to solicitation amendment 001 - – Must have a built-in laser plummet.

Q7: Sec 1.40 Fixpoint and measurement data must immediately write and be stored on the internal memory (when not using an external data collector) and/or have a minimum ½ hour battery backup so data is not lost if there is a sudden power loss

Why is it mandatory? The data is stored on the data collector.

A7: The device must be able to operate as a standalone with no data collector. NO Change to this requirement.

Q8: Sec 1.45 Must be able to be fully operated either directly from the measurement head keyboard or the hand held pole mountable data controller

Why is it mandatory? The data is stored on the data collector.

A8: The device must be able to operate as a standalone with no data collector. NO Change to this requirement.

Q9: Sec 5.1 Must be extendable with a minimum working height of 1.30m

Why is it mandatory?

A9: Change this mandatory requirement into “must be extendable with a minimum working height of 1.00m”. See revision for 5.1 below.

SOLICITATION REVISIONS

1) On page 13 & 20 at Annex A & C,

DELETE: 1.31 Must be able to communicate with an external data collector wirelessly via a built in radio handle

INSERT: 1.31 Must be able to communicate with an external data collector wirelessly via a built in radio

2) On page 13 & 20 at Annex A & C,

DELETE: 1.32 Must have a minimum wireless onboard data collector communication range of 800m (linear) and have a unique Bluetooth address to avoid radio interference

INSERT: 1.32 Must have a minimum wireless onboard data collector communication range of 800m (linear).

3) On page 16 & 22 at Annex A & C,

DELETE: 5.1 Must be extendable with a minimum working height of 1.30m

INSERT: 5.1 Must be extendable with a minimum working height of 1.00m

All other terms and conditions remain unchanged.
