Solicitation Amendment 001 is issued to respond to bidder questions.

A) Bidder questions

Q1) Please provide a copy of CCG Welding Specification CT-043-EQ-EG-001

A1) Please see attached document

Q2) Section 5.0 Inspection – Are any costs related to TCMSS Inspections the responsibility of the fabricator?

A2) Correct, any inspection fees must be included in the bid price.

Q3) Note 5 Under strainer renewals – Contractor must ensure orientation of flanged connections match up. Will CCG representatives verify our fabrication drawings with hole layout? Or does the fabricator have to physically visit the vessel to verify orientation?

A3) The vessel will not be available to confirm the orientation of the flanges. Orientation of the flanges must be carried out as per the construction drawing. Photos attached for reference.

Q4) Please be advised that we were trying to source the covers for these strainers, and identified through engineering/supplier that with the internal coating (and the internal O-ring groove) we will not be able to coat and not meet the requirements. Can you advise if you will accept a bolted cover which would eliminate that problem? Our experience in the past is that if the groove is not coated, it will be exposed to the media and will eventually corrode/rust and create a leak path.

A4) No, Coast Guard will not accept a flange type bolted cover with a gasket. Contractors must fabricate and coat the strainer cover/housing as detailed in the construction specification.

All other terms and conditions remain unchanged.
