B. Questions and Answers

Q1. The response to A4 on Solicitation Amendment 01 lead us to reach out to the supplier to source parts/pricing for the 3 units. Please see their response highlighted below:

Thank you for your email. Both the 3031 and the M660 are legacy Clearview Intelligence (formerly Golden River Traffic/Clearview Traffic Ltd.) products that were discontinued some years ago. As such, we no long support repairs of these products ourselves, or stock spares.

Our 8-loop M680 is the direct replacement for the M660.

Where do we get parts for the 3031, and is it acceptable to PCA that the M660 (that require repair) be changed to M680 models (provided)?

A1. PCA currently has 13 spare 3031 counters. If a counter cannot be repaired with available parts, it will be replaced with one of the spares. The current available replacement counter for the 3031 is the M680.

Replacement of the M660 to the M680 model has already been identified in Annex B – Basis of Payment section 1.5, 2.5, 3.5, and 4.5. Annex B – Basis of Payment is amended below to remove sections 1.5.4, 2.5.4, 3.5.4 and 4.5.4 for the M660 Classifier.

Please note that as per Annex A – Statement of Work, section 3.1.1, the contractor must have experience with the operation and maintenance of these specific ATRs. Since these are dated units, they require calibration to function efficiently.
