REVISION 002

This revision 002 is raised to publish questions and answers and to modify the annex A – Statement of Work, as follows:

1.0 QUESTION / ANSWER:

Q1. : At section 3.0 - Lockable secure storage unit

(c) The secure storage unit must have a minimum of two drawers that can be individually locked with unique key (The key must not unlock other units in other vehicles).

At this time no manufacturer will provide unique keys on storage container for individual vehicles. Could the solicitor advise if there is a possibility to remove this clause? Since the vehicles are keyed individually themselves it gives an extra layer of protection before one can get to the storage container.

A1. : We still require to have a key locking system but wish to remove the clause which indicates that the key must be unique to the storage unit. Please see the Statement of Work modification below. The word "unique" is removed.

Q2. : At section 2.3.1 and 2.3.2 (a) the following requirements request aluminum fold-down interior window guards and door panels.

We understand that this is likely so the window can be cleaned as required. We have concerns that this may cause issues with the side airbag deployment.

We have a design that utilizes a window guard that comes away from the window to allow the K9 unit to be airbag compliant. The proposed designed window guard has a large gap between guard and the window, there would be no contact with the dog and the window enabling easy access to the window for cleaning without the need to have a folding window guard. This design ensures side airbag compliance.

Our question is: Would the proposed alternative solution be acceptable in place of the requirement described in Section 2.3.1 and 2.3.2?

A2. : The proposed solution protector is acceptable, as long as it is easy to remove. This requirement is also necessary to be able to tint the windows after the insert installation. The foldable protector meets the requirements for the airbags, as this is only performed when the vehicle is not in motion.

2.0 MODIFICATION / ANNEX A – STATEMENT OF WORK

At section 3.0 - Lockable secure storage unit

(c) The secure storage unit must have a minimum of two drawers that can be individually locked with unique key (The key must not unlock other units in other vehicles).

DELETE: In its entirety.
