Title: International Environmental Support Services

Solicitation Number: 18-142656-BH

The following Questions & Answers is in link with the Request for Proposal document mentioned above.

Questions & Answers # 5

Q10. In RS 5, page 56, Environmental Expert is defined as a professional engineer with at least 10 years experience. Does a CIH with 10 years experience also qualify as an expert?

A10. *For the purpose of this contract, the senior professional engineer with at least 10 years of environmental experience will be the environmental expert called upon by DFATD to provide advisory and support expertise on behalf of the Contractor under RS 5. A CIH with 10 years of experience would not be a substitute for a senior professional engineer with 10 years of environmental experience. Given the diversity of potentially required expert services, the professional engineer may be assisted by other environmental experts in their respective fields, including a CIH.*

All other conditions and requirements remain unchanged
