Title – Titre :
Riverwalk Clean-up – The Forks National Historic Site

Amendment 003

This amendment is raised to answer additional bidder questions and provide an access map.

A. Questions and Answers

- Q1.** Can Equipment get down onto the river walk area? If so where would access be allowed and is it large enough to get tandem dump trucks and skid steers/mini excavators down there?
- A1.** In the past tandem trucks have been used to remove and deliver. The bottom of the ramp South of the Amphitheatre is too small for trailer loads. Mini excavators and skid steers are used to clean the theatre area and small excavators have been used to clean along the river to the North point. In the past tandem trucks have turned around and backed down the river to spread gravel. The black dots on the attached map show the access route the contractor would have to use.
- Q2.** It says that there is a water supply but the hoses will only cover the northern clean up area. If other hoses are brought will the water supply reach the entire river walk or does water need to be brought in to pressure wash everything?
- A2.** The site has irrigation lines that follow the semi circle of the theatre and towards the ramp. A second pipe at the boat dock. This is dependent on the time of year and whether the irrigation system is operational. In most cases damage occurs while clearing silt making it non-operational. The contractor should plan on taking water from the River.

B. Additional Attachments: Access Map

The following document has been added and is included in the Attachment Section of the Posting:
