This revision is for the following correction:

PART 4 - EVALUATION PROCEDURES AND BASIS OF SELECTION

4.3 Basis of Selection

DELETE

To prevent having the same lantern model (regardless of features) winning twice for a category, the model with the lowest unit price will be selected.

Example:

Category 1A:

Manufacturer ABC, lantern model A (with features 1, 2), unit price \$95;

Manufacturer ABC, lantern model A (with features 3, 4), unit price \$100;

Manufacturer CDE, lantern model B (with features 1, 2, 3), unit price \$125.

The lantern model A priced at \$95 will be selected, so as to prevent having the same model twice for that category. Category 1A winners: model A (\$95) and model B (\$125).

INSERT

To prevent having the same lantern model (regardless of features) winning twice for a category, the model with the lowest "total evaluated offer value" will be selected. Each category cannot have the same model twice.

Example:

Category 1A:

Bidder 1: Manufacturer ABC, lantern model A: total evaluated offer value \$10,000;

Bidder 2: Manufacturer ABC, lantern model A: total evaluated offer value \$10,500;

Bidder 3: Manufacturer CDE, lantern model B: total evaluated offer value \$11,000.

The lantern model A with the total evaluated offer value of \$10,000 will be selected, so as to prevent having the same model twice for this category.

Category 1A winners: Model A (total evaluated offer value \$10,000) and Model B (total evaluated offer value \$11,000).
