La modification 003 vise à indiquer ce qui suit:

Question 1: In order to receive pricing for the leak detection system from our electrical contractor we require the location of the monitoring panel and where the power feed to the panel is coming from. Please provide.

Réponse 1: Both the monitoring panel and the existing electrical panel will be located within the mechanical room that the pipes are routed into when they pass through the foundation wall of the existing Coast Guard building.

Question 2: Should the in-house controls contractor be pricing the tie-ins of the outputs to the building automation system? Please confirm this is Controls and Equipment work.

Réponse 2: Contractor (successful bidder of this tender) is responsible for all labour and materials associated with the tie-ins to the building automation systems (as described in the specifications and plans); to be performed by the on-site controls contractor maintaining the controls of the CCG building and BIO campus, Controls and Equipment.

Toutes les autres conditions demeurent inchangées.
