AMENDMENT 006**This amendment is issued in order to answer the following questions:**

Question/Answer	Architectural and Engineering Questions and Answers
Q42	The addendum 1 does not specifically answer the following question: Please refer to P19 , 1.and 3.1 .2a) .These clauses require that the proponent to be licenced as both an architectural and engineering firm. The province of British Columbia is the only province in Canada that does not issue 'certificates of practise' for engineering firms. The licences are issued to individuals only. In other words NO Proponent firm can be Licenced directly as an engineering firm in the province of British Columbia and therefore this mandatory requirement cannot be met as worded . The licences to practise engineering are only issued to the individual engineers who can then practise under an umbrella proponent firm. This is different from architectural proponent firms who are issued licences(certificates) to practise as an architectural firm and then there are architects who are issued licenced to practise as individuals and who then practice under the umbrella of the licenced architectural firm. Therefore, please clarify how the proponent firm can meet the intent of the mandatory dual licencing requirement?
A42	Where the Proponent is a firm located in a province or territory which does not provide licences to firms, Proponent should provide as proof of licencing: 1) a statement specifying the province or territory where the firm is located and specifying the province or territory does not provide licences to firms; and 2) proof of licencing of the principals of the firms
Q43	Is there a scope available for the Indigenous Artwork Specialist? If not, can you provide a disbursement for these services?
A43	<p>The Indigenous Artwork Consultant will work with the project team to develop program of art that includes integrated artwork and non-integrated artwork. The consultant may be required to work with indigenous communities to define artwork that will be included in the art program.</p> <ol style="list-style-type: none"> 1. Integrated artwork includes art/art projects that are linked and/or integrated into the architectural and/or landscape design of the facility. 2. Non-integrated artwork includes stand-alone art projects which can be implemented on their own provided the appropriate means of affixing/supporting the artwork is designed and constructed.
