AMENDMENT 003:

This Amendment is raised to answer questions received from the industry and to extend the closing date.

1. EXTEND CLOSING DATE

The closing date has been extended to July 7, 2020

2. QUESTION AND ANSWERS

Question #1:

[R4] The skimmer must be capable of collecting and pumping oil up to 600 000 centistokes in viscosity.

Is it possible to provide the specific weight of the oil to confirm the correct value of the stated viscosity, as we work in oil viscosities up to 20.000 centistokes?

As normally above this number of centistokes value the oil is no longer fluid, which makes recovery by high capacity skimmers impossible (unless the oil is heated to become fluid again).

Answer #1:

CCG cannot provide the specific weight of the oil, as it will be dependent on various factor encountered during an oil spill, including oil type and temperature. CCG is required to respond to oil spills of various sizes in various locations and conditions, including in sub-zero and arctic weather. As such, the skimmers needed must be able to collect and pump oil of up to 600 000 cSt. CCG will consider all options, including mechanisms to heat the oil, to achieve this requirement.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED
