**ADDENDUM NO. 5**

Subject: **Request for Proposal (RFP) - FP802-200073**

Title: Placing, lifting / removal, maintaining and the servicing of Buoys in the  
Newfoundland & Labrador region

Dear Sir/Madam:

Further to the above-mentioned Invitation to Tender, this Addendum no.5 is to advise potential bidders of the following Question & Answer:

**Question 5:** I just reviewed Addendum 4 and there was a misunderstanding in my question.

What months during the year is the buoy maintenance taking place, is it during summer months or year round?

**Answer 5:** Buoys fall into three categories. Year round, seasonal, and seasonal (in place year round). For year round buoys, the contractor is expected to maintain the inventory, including scheduled mooring changes, which should take place before or during the navigation season, perform other maintenance, and address discrepancies year round. For seasonal buoys, the contractor is responsible to have the buoys in place for the beginning of the season (dates vary and can sometimes depend on ice conditions), respond to any discrepancies during the season of operation and remove the buoys at the end of the navigation season prior to the ice jeopardizing the inventory. For seasonal (in place year round) buoys, the contractor is to check the operational status of the buoy prior to the start of the navigation season as it has been in the water over the winter months, install lantern on the buoy (if applicable) and remove after the season is over. The contractor will also be responsible to address all discrepancies and required maintenance, including scheduled mooring changes over the season of operation for seasonal buoys (in place year round)

All other terms and conditions remain unchanged.

Yours truly,

**Stéphane Julien**
