AMENDMENT 009

This amendment is issued in order to make changes to the French version of question 13 of amendment 008

Question / Answer	Construction Management Services Questions and Answers
Q13	<p>SRCL Clarification</p> <p>Request clarification of the security requirements for the Construction Management Services on this project as noted below: Specifically, the Security Requirements Check List (SRCL) at Annex D of the RFP states in Part B Section 10.a. that the "Production and Storage of Protected information shall be restricted to the Prime Consultant only." This implies that the Construction Manager and personnel will only require the Reliability clearance in order to view any documents that might be at the Protected B level. However, in the same SRCL in Part C Section 11 it states that the Construction Manager is required to have Document Safeguarding (DSC) and the ability to electronically process, produce or store Protected materials under an IT Media certification. It is requested that the Contract Authority confirm that only individuals with Reliability clearances are required at the beginning of this CM Services contract, and not a DSC or IT Media capability.</p> <p>To note, the recent notices from CISC as to the significant delays caused by the COVID-19 pandemic and government directed restrictions have massively reduced the ability of CISC to respond to new clearance and DSC/IT Media capability requests.</p>
A13	<p>Clarification to Annex D Security Requirements Check List (SRCL)</p> <p>The security requirements expressed in the SRCL as appended to the RFP are a requirement of the Prime contractor at all times during the life of the contract. The Prime Contractor, should foremost keep in mind that they must adhere to the directions given in the Industrial Security Manual (ISM) and should also keep foremost in mind that they will be accountable for maintaining security during the life of the contract. Within the ISM, it indicates that any subcontracts to be issued <u>that contain a security requirement</u> must be processed through the Contract Security Program (CSP) – Industrial Security Sector (ISS)¹.</p> <p>The security requirements executed with the Prime are not necessarily required of a subcontractor²; for instance, the Prime may decide that a subcontract for a hydrological survey may have zero sensitive information (a.k.a. Protected information) and therefore there is zero requirement for</p>

	<p>Document Safeguarding measures. However, because of the possibility of accidental oversight of sensitive information at the Prime Contractor's site office – there is a requirement for the personnel conducting the hydrological survey to have a valid Reliability Status. These requirements – which are clearly dissimilar to the security requirements between the Crown and the Prime – would be expressed in the SRCL between the Prime and the Subcontractor; and that SRCL shall be processed by CSP-ISS as provided in the Industrial Security Manual.</p> <p>¹ Industrial Security Manual, section 104.1.b</p> <p>² Industrial Security Manual, section 703.4</p>
