**Amendment 001 is raised to:**

- 1. Extend Solicitation Closing Date;**
- 2. Answer bidder questions;**
- 3. Amend Part 1: Product Categories: 1, 2 and 5, Table 1;**
- 4. Amend Part 4 to separate items 4-8 and non-SA items 1-2 into new table called Product Table Category 6B – Mobile Lounge; and**
- 5. Amend Annex D.**

**1. Extend Solicitation Closing Date:**

Under Cover page – Solicitation Closes:

DELETE: 2020-07-09

INSERT: **2020-07-23**

**2. Bidder Questions and Answers**

Q1: The inclusion of magnetic wire management is a brand-specific specification that will prevent reasonable competitive bidding. Wire management can be attached in a number of ways that are semi-permanent and secure power and data cables safely – will vertical wire management be considered that use other semi-permanent adhesion methods?

A1: We will change this requirement to “\*\*\*With Vertical Wire Management Chain”. Please see amendments below for Part 1: Product Categories 1, 2 and 5, items 9-13.

Q2: There seems to be a repetitive requirement for power by using the fence and a power bar and the table mounted power. This can be achieved by the height adjustable benching which is an SA product and the privacy screens can also be attached and the power is incorporated much cleaner

A2: The client does not want any panels in front of the sit-stands, only a privacy/modesty screen. The power requirement is for the middle beam panels which has a fixed surface attached to it. With the benching systems you need to have a minimum of two Sit-Stands back to back with a middle panel and there is only one area which this is possible.

Layout cannot be achieved with height adjustable benching.

Q3: In Category 1A you are asking for a Fabric Surface Mounted Privacy Screen while in the NSA Products section you are requesting the Elevated Beam Panel “with frosted glass privacy screen above track. Can these be fabric?

A3: The beam upper add on panel must be frosted glass.

Q4: In Annex D – 1. Specifications for CAT 1, Non SA items 1 to 5” section .1.2 you are referring to “A fabric divider screen shall be mounted to the top of the horizontal beam while in the NSA products you are referring to “with frosted glass privacy screen above track.” Can this be fabric?

A4: It cannot be fabric, but will correct to “frosted glass divider screen”. See amendment below.

Q5: Grommet placement is understandable, however the requirement for metal grommet covers adds unnecessary additional cost without any benefit over standard plastic grommet covers. With that in mind, please advise if standard grommet covers are acceptable?

A5: Yes this standard grommets covers are acceptable, please see amendment below.

### 3. Under Part 1: Product Categories: 1, 2 and 5, Table 1 – Product Table:

**5. Under ANNEX D, Additional Specifications, Certifications, 1. Specifications for CAT1, Non SA items 1 to 5, .1 Description**

DELETE: in its entirety

INSERT

- .1 Description
  - .1 A separate, freestanding, UL Certified power and data distribution beam panels system.
  - .2 A **frosted glass** divider screen shall be mounted to the top of the horizontal beam, matching the width of the adjustable table work surface (+/- 2") and shall cover the full ANSI/BIFMA height range of 22"-48" (+/- 2") travel of the table.
  - .4 The total height of a *seated privacy height* panel can be achieved with a *base panel height* and one *panel add-on module*. Must not exceed 1372mm (54 in.) high.
  - .5 The vertical post between and at the end of beams shall have 4 access points (one on each side of square post leg) to allow the system to be arranged in a straight line, L-shape, T shape or X shape configuration with a single universal jumper cable connecting the electrical system from beam to beam.

**ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED**
