

ADDENDUM 001

The following addenda are in force:

Refer to Specifications:

Environmental Specification Section - 01 35 44

A daily pre-event survey will be conducted by the Departmental Representative for the presence of Cetaceans (whales, dolphins, porpoises) and/or SARA listed Species at Risk in the area. Shore-based observations will be conducted for a minimum of 30 minutes prior to the commencement of the dredge activity, and if Species at Risk or Cetaceans are observed within a 500 m radius of the dredge activity, operations cannot begin until the 500 m radius is clear of Species at Risk or Cetaceans for a minimum of 30 minutes. If Species at Risk or Cetaceans are observed within a 500 m radius of the dredge activity during the activity, operations are to be suspended, and will remain suspended until the 500 m radius is clear of Species at Risk or Cetaceans for a minimum of 30 minutes.

Dredging Section - 35 20 23

Hydrographic survey will utilize multibeam survey equipment, Reson T50 technology. Hydrographic pre-dredge survey was completed on July 7, 2020. Post survey will be completed with same equipment.
