**Amendment 003 is raised to answer bidder questions:**

- Q1: The structural beam image in the tender document does not support surfaces. Is that the intent?
- A1: Yes this is the intent. Return worksurfaces (RFB lines 4,5 and 6) are freestanding at the beam, however, a previous addenda allows worksurfaces to be supported by the beam as well.
- Q2: In area marked "work area 127" above room 625 there is no beam showing. Do you require one? Also in area 611 and 616 there is no beam showing do you require one?
- A2: No beam required – electrical & data services are provided at the partition.
- Q3: For items 12 & 13, are we to follow the dimensions shown in the RFB or will the tops need to have a gap typically found in cubicles to allow the sit/stand to go up and down smoothly?
- A3: As per Annex A-Technical SA Specifications, every work surface must have a finished gap which is also called a "pinch point gap".
- Q4: For item #1 in Table 4, the RFB states this is a metal pedestal but the GoCUID calls for laminate.
- A4: As per Annex A-Technical SA Specifications, a pedestal base is: A central pedestal base supported by a disc or 4-star base with levelling glides.  
The GoCUID calls for a laminate top but the base clearly has to be in chrome or metal in order to meet the pedestal base criteria.
