SOLICITATION AMENDMENT # 004

This solicitation amendment is raised to:

1. Address the following questions submitted during the solicitation period as per RFP.
-

1. QUESTIONS AND ANSWERS

Q7. There is a requirement for pricing a shrink-wrapping component, please advise the quantity of items to be in each shrink-wrap package?

A7. There is no requirement for pricing shrink-wrapping separately. The cost of this is to be factored into the pricing of each item. Many items will not require shrink-wrapping; if items need to be shrink-wrapped, the quantity in each shrink-wrapped package will be specified in the SOW.

Q8. In the pricing section we are asked to price MICR printing, but there are two types based on the specifications, either static or variable MICR printing and each is done differently and has a different cost associated with it, can the pricing table be adjusted to have pricing for each method?

A8. There is no requirement for pricing MICR printing separately. For items requiring static MICR, this will be considered an additional ink colour. Variable MICR for items such as batch cards should have that factored into the pricing of those items.

Q9. There are requirements for perforations. Please confirm that all perforation would be a straight line that runs across the entire sheet. If not, please provide more details regarding the perforation requirements.

A9. All perforations will be straight lines that run across the entire sheet.

Q10. To provide pricing for shipping we require specific postal codes for delivery destination locations, not just the city of delivery.

A10. Postal codes cannot be provided for all delivery destination locations, as the specific address may change. City of delivery should be sufficient to obtain accurate prices.
