n/a

Title – Titre :
LiDAR and Orthophoto Imagery Data Collection - Riding Mountain National Park, MB

Amendment 001

This amendment is raised to answer bidder questions.

A. Questions and Answers

- Q1.** While “leaf off” conditions are ideal for LiDAR the imaging will likely be impacted. Can you confirm that both imaging and LIDAR are to be captured given the timing of the Contract?
- A1.** Yes, all data sets mentioned in Annex A are required deliverables, RGB and LiDAR are higher priority items and imaging has been included for efficiency so all data can be collected at once.
- Q2.** The RFP under subsection “3.1 Approach and Methodology – LiDAR” requires an Aggregate Nominal Pulse Density (ANPD) of 10 points per m², while the “ANNEX A – STATEMENT OF WORK” refers to a minimum of 2 points per m². Please can you confirm what LiDAR point density is required for this project?
- A2.** The Federal airborne LiDAR data acquisition guideline referenced in Annex “A” informs the ideal accuracy and density. The 2 pts/m is included as an acceptable minimum.

ALL OTHER TERMS & CONDITIONS REMAIN UNCHANGED
