

2 lock Rings

Q792

A close-up photograph of a metal surface, possibly a piece of machinery or a tool. A ruler is placed horizontally across the middle of the frame, with markings visible. Below the ruler, there is a small, dark, rectangular object, possibly a component or a defect. The metal surface has a mottled, yellowish-brown appearance, suggesting corrosion or a specific material. The ruler has markings in inches and centimeters. The small object is located near the 1-inch mark on the ruler.
