3. **Evaluation Procedures:**

Proposals will be evaluated in accordance with the Evaluation Procedures and Criteria specified in Part 4.

- (a) Bids will be assessed in accordance with the entire requirement of the bid solicitation including the technical and financial evaluation criteria. Failure to submit a financial and/or technical proposal with the bidder's submission shall result in the bid being deemed non-compliant and will not be evaluated.
- (b) An evaluation team *may be* composed of representatives of Canada.

The evaluation team reserves the right but is not obliged to perform any of the following:

- a) Seek clarification or verify any or all information provided by the Bidder with respect to this RFP;
- b) Contact any or all of the references supplied and to interview, at the sole costs of the Bidder, the Bidder and/or any or all of the resources proposed by the Bidder to fulfill the requirement, on 48 hours notice, to verify and validate any information or data submitted by the Bidder.

Contractor Selection Method is outlined in Part 4 Article 4.

PART 4 – EVALUATION CRITERIA AND BASIS OF SELECTION

1. Evaluation Procedures

- (a) Bids will be assessed in accordance with the entire requirement of the bid solicitation including the technical and financial evaluation criteria.
- (b) An evaluation team will evaluate the bids.

The evaluation team reserves the right, but is not obliged, to perform any of the following:

Seek clarification or verify any or all information provided by the Bidder with respect to this RFP.

2. Experience:

Bidders are advised that only listing experience without providing any supporting data to describe responsibilities, duties and relevance to the requirements, or reusing the same wording as the RFP, will not be considered "demonstrated" for the purposes of this evaluation. **The Bidder must provide complete details as to where, when, month and year, and how, through which activities / responsibilities, the stated qualifications / experience were obtained.**

Experience gained during formal education shall not be considered work experience. All requirements for work experience shall be obtained in a legitimate work environment as opposed to an educational setting. Co-op terms are considered work experience provided they are related to the required services.

When completing the resource grids the specific information which demonstrates the requested criteria should be in the grid. The reference to the page and project number should also be provided so that the evaluator can verify this information. It is not acceptable that the grids contain all the project information from the résumé, only the specific answer should be provided.

Bidders are advised that the month(s) of experience listed for a project in which the timeframe overlaps that of another referenced project will only be counted once PER RESOURCE. For example: Project #1 timeframe is July 2001 to December 2001; Project #2 timeframe is October 2001 to January 2002; the total months of experience for these two project references is seven (7) months.

Bidders are also advised that the experience is as of the closing date of the Request for Proposal. For example, if a given requirement states "The proposed resource must have a minimum of three (3) years' experience, within the last six (6) years, working with Java", then the six (6) years are accounted for as of the closing date of the RFP.

PROPOSALS NOT MEETING THE MANDATORY REQUIREMENTS BELOW WILL BE GIVEN NO FURTHER CONSIDERATION

3. MANDATORY REQUIREMENTS

The bid must meet the mandatory technical criteria specified below. The Bidder must provide the necessary documentation to support compliance with this requirement.

Any bid which fails to meet the mandatory technical criteria will be declared non-responsive. Each mandatory technical criterion will be addressed separately.

Bidders are advised that they may only propose the required number of resources identified in the Mandatory Criterion for each category. If a Bidder proposes more than the required number of

PART 4 – EVALUATION CRITERIA AND BASIS OF SELECTION

resources, resources will be evaluated alphabetically by last name of the resource with consideration only given to the required number of resources unless another order of preference is provided by the Bidder. Additional resources proposed by the bidder will neither be considered nor evaluated.

The Bidder must *provide sufficient detail to clearly demonstrate how* they meet each mandatory requirement below. Bidders are advised that only listing experience without providing any supporting data and information to describe responsibilities, duties and relevance to the requirements, or reusing the same wording as the RFP, will not be considered “demonstrated” for the purpose of this evaluation.

ANNEX A – STATEMENT OF WORK

1. TITLE

Support for Cospas-Sarsat Tasks Associated with: Cospas-Sarsat Beacon Standards Second Generation Beacons and Emergency Locator Transmitter – Distress Tracking Beacons; Cospas-Sarsat MEOSAR Initial Operational Capability; ICAO Automatic Distress Tracking requirements and; Cospas-Sarsat LEOSAR and GEOSAR contingency planning.

2. OBJECTIVE

Public Safety Canada (PS) currently has a requirement to obtain expert assistance for the National Search and Rescue Secretariat (NSS) in its relations with the Cospas-Sarsat (C/S) Programme. This assistance will require work related to C/S specifications and standards as described in section 5 below. This assistance will also include work related to the development and implementation of the Medium Earth Orbit Search and Rescue Satellite (MEOSAR) system, Second Generation Beacons (SGBs), Return Link Service (RLS) capabilities and ICAO Autonomous Distress Tracking (ADT) requirements related to the Global Aeronautical Distress and Safety System (GADSS). This support will involve the preparation and presentation of papers, review of others' papers, analysis of test support and test results and attendance at C/S meetings in support of the Canadian delegation in this work.

3. BACKGROUND

The NSS represents Canada at C/S – an international search and rescue (SAR) satellite program dedicated to assisting SAR activities by providing accurate, timely, and reliable alert and location data to the international community on a non-discriminatory basis. As one of the four founding members of C/S, one of only six space segment providers and as the owner and operator of the world's second largest C/S ground segment, Canada's role in maintaining C/S as a high quality, operationally effective system is substantial. The system's high operational effectiveness is attributed to strict adherence to standards and specifications that are continually studied, refined and agreed upon by all countries participating in the C/S Programme.

The C/S Programme is currently involved in four major initiatives: the implementation of the MEOSAR system; the development of Second Generation Beacons; the development of beacons and ground infrastructure to support the ICAO Global Aeronautical Distress and Safety System (GADSS) and; the implementation of Return Link Service (RLS), all while maintaining its current specifications and standards for existing operational systems. Canada has an international responsibility to support these initiatives. In addition, Canada has a number of related national and bi-lateral (Canada-USA) issues related to Canada's MEOSAR space and ground segment procurement projects and changes to Canadian beacon specification regulations.

It is important that Canada, given its significant position within the C/S Programme, participate with a strong level of expertise in all C/S matters. Advancing these four initiatives, as well as maintaining the current systems, standards and specifications involves work in correspondence groups and the analysis of tests and studies culminating in recommendations to C/S Council and subordinate committees and groups. Due to Government of Canada staffing levels in the required operational, maintenance and regulatory areas it is very difficult to assemble a delegation with the requisite expertise and experience. External expertise is therefore needed to support these initiatives. This includes the preparation for international meetings, participation in working groups at the meetings and follow on actions after the meetings.

The Contractor must be prepared to provide support for any of the C/S meetings, as requested by the TA. This may necessitate the Contractor working evenings and/or weekends based on the scheduling of the meetings.
2. For each C/S meeting, the Council establishes a deadline time by which all papers for the meeting must be submitted to the C/S Secretariat. Although some meeting dates are published they may not be held as planned and national and bilateral meetings have no fixed timings. Therefore, the exact scheduling over the period of this contract cannot be fixed. The contractor must be flexible in being able to accommodate both the unknown dates and those that are planned but may change.

12. POLICY ON GREEN PROCUREMENT

(to be filled in at contract award):

Canadian Customs Duty and GST/HST extra.

All deliverables are F.O.B. Destination, and Canadian Customs Duty included, where applicable.

Definition of a Day/Proration: A day is defined as 7.5 hours exclusive of meal breaks. Payment will be for days actually worked with no provision for annual leave, statutory holidays and sick leave. Time worked ("Days_worked", in the formula below) which is less than a day will be prorated to reflect actual time worked in accordance with the following formula:

$$Days_worked = \frac{Hours_Worked}{7.5_hours_per_day}$$

2 Method of Payment

Canada will pay the Contractor on a monthly basis for work performed during the period, covered by the invoice in accordance with the payment provisions of the Contract if:

- a. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
- b. all such documents have been verified by Canada;
- c. the Work performed has been accepted by Canada.

3. Payment Period

- 3.1. Canada's standard payment period is thirty (30) days. The payment period is measured from the date an invoice in acceptable form and content is received in accordance with the Contract or the date the Work is delivered in acceptable condition as required in the Contract, whichever is later. A payment is considered overdue on the 31st day following that date and interest will be paid automatically in accordance with the section entitled Interest on Overdue Accounts of the general conditions.
- 3.2. If the content of the invoice and its substantiating documentation are not in accordance with the Contract or the Work is not in acceptable condition, Canada will notify the Contractor within fifteen (15) days of receipt. The 30-day payment period begins upon receipt of the revised invoice or the replacement or corrected Work. Failure by Canada to notify the Contractor within fifteen (15) days will only result in the date specified in subsection 1 of the clause to apply for the sole purpose of calculating interest on overdue accounts.

4. GOOD AND SERVICES TAX (GST) / HARMONIZED SALES TAX (HST)

All prices and amounts of money in the Contract are exclusive of Goods and Services Tax (GST) or Harmonized Sales Tax (HST), as applicable, unless otherwise indicated. The GST or HST, whichever is applicable, is extra to the price and will be paid by Canada.

The estimated GST or HST is included in the total estimated cost. GST or HST, to the extent applicable, will be incorporated into all invoices and progress claims and shown as a separate item on invoices and progress claims. All items that are zero-rated, exempt or to which the GST or HST does not apply, are to be identified as such on all invoices. The Contractor agrees to remit to Canada Revenue Agency any amounts of GST and HST paid or due.
