This amendment 005 is raised to answer bidder questions as follows and extend the closing date from August 17, 2020 to August 31, 2020:

Questions:

1. Part 6.4.5 After Sales Service. It states, ***"The bidder should show the distance between the delivery location and the authorized dealer and/or agent and the delivery location, which should not be more than 100 kilometres."*** Because of the nature and advanced technologies of the chassis, controls systems and mounted specialized equipment, is the client accepting of service locations located further than the 100 kms requested? I.e. Calgary, Cranbrook, Kelowna, Kamloops
2. Annex "B" Heavy Tandem Truck, Section 2.12 Hydraulic System subsection 2.12.2 (a), (b) and (c). ***"The system must be used to operate all of the following hydraulic components: a) Double acting snow wing, b) Double acting front mount one way and two plows, c) Double acting under body plow."*** The solicitation does not indicate the truck to be supplied with a snow wing, front plow and hitch and underbody plow, however it is required to have the necessary controls to operate this equipment. Does the client require these additional components to be supplied and installed, if so what specs does the client require?
3. Annex "B" Heavy Tandem Truck, Section 2.12 Hydraulic System subsection 2.12.9 (f) ***"The ability to control a material pre-wetting system"*** Does the client require a prewet liquid tank to be included as mounted equipment, as there is no indication of one being required except for having the ability to control one?
4. **Question from Amendment 004:**

Can you advise for item 2.13.1L(1) you would accept 10" structural channel longills with a strength of 20 lbs per foot with a 5 year structural warranty?

Responses:

1. Yes we will accept service locations in these areas.
2. The client only requires the truck to have the necessary controls to operate this equipment.
3. The client only requires the truck to have the necessary controls to operate this equipment.
4. **Question from Amendment 004:**

DELETE

Answer amendment 004:

We require I-beams with a minimum strength of 25.4 pds per foot.
