Solicitation Amendment 005 is issued to distribute responses to questions submitted to the Contracting Authority.

Question 1:

In Annex F, No. 9 Davit Section, it references load testing the winch and brake system to 2.2 SWL. As per MCS 81(70) 8.1.1 it reads, " For lifeboats other than free-fall lifeboats, davits and launching appliances, except the winch brakes, should be subjected to a static proof load of 2.2 times their maximum working load."

Can Annex F No.9 Davit section be revised to state, "Davit except the winch brakes should be subjected to a static proof load of 2.2 times their maximum working load"?

Answer 1:

The following in Annex "F", Davit Section No. 9:

No.	Item	Question	Cross Reference	Bidder Response
9	8.2-Davit	Confirm that the winch and brake assembly can be load tested to 2.2 x SWL? (Y/N?)	MT-11/13	

is deleted in its entirety and replaced with the following:

No.	Item	Question	Cross Reference	Bidder Response
9	8.2-Davit	Confirm that the winch and brake assembly can be load tested in accordance with the following requirements: (Y/N?) a) a static test with a proof load of not less than 1.5 times the maximum working load for which the device is designed; and b) a dynamic test at the maximum lowering speed with a proof load of not less than 1.1 times the maximum working load for which the device is designed.	MT-11/13	

All other terms and conditions remain the same.
