Amendment 003

This amendment is being raised to distribute questions and answers.

A. Question and Answer

Q50 I would like to request the approval of C900 PVC Certa-Lok RJIB for the trenchless installation of water and sanitary mains via pipe bursting. Please find attached product specifications.

A50 The successful contractor may propose alternative design, construction methodology, materials etc. upon award of the contract. Alternatives will be considered, provided they meet the same performance and intent as outlined in the tender documents.

Q51 I noticed that the insulation specified for the pipes 25 mm or 50 mm Dow Hi 40 or Owens Corning Formular 400.

We have been successful at getting 32 mm and 64 mm EPS39 approved for the same use with the City of Calgary Waterworks. This will allow for the same overall R value but at a far more cost effective price. Would the EPS39 be an acceptable alternative for this project?

A51 The successful contractor may propose alternative design, construction methodology, materials etc. upon award of the contract. Alternatives will be considered, provided they meet the same performance and intent as outlined in the tender documents.
