- 2.1 Agriculture and Agri-Food Canada will only consider Proposals which accept Agriculture and Agri-Food Canada's terms and conditions.

### **3.0 INCURRING COST**

- 3.1 The cost to prepare the Proposal will not be reimbursed by Agriculture and Agri-Food Canada.

## **5.0 RIGHTS OF CANADA**

- 5.1 Canada reserves the right to:
1. Accept any Proposal in whole or in part, without prior negotiation;
  2. Reject any or all Proposals received in response to this RFP;
  3. Cancel and/or re-issue this RFP at any time;
  4. Ask the Bidder to substantiate any claim made in the Proposal;
  5. Enter into negotiations with one or more Bidders on any or all aspects of their Proposals;
  6. Award one or more Contracts;
  7. Retain all Proposals submitted in response to this RFP.

## **6.0 SUBSTANTIATION OF PROFESSIONAL SERVICES RATES**

- 6.1 In Canada's experience, bidders will from time to time propose prices at the time of bidding that they later refuse to honour, on the basis that these prices do not allow them to recover their own costs and/or make a profit. When evaluating the prices for professional services bid, Canada may, but will have no obligation to, require price support for any prices proposed. Examples of price support that Canada would consider satisfactory include:
1. documentation (such as billing records) that shows that the Bidder has recently provided and invoiced another customer (with whom the Bidder deals at arm's length) for services similar to the services that would be provided under a resulting contract, and the fees charged are equal to or less than the price offered to Canada (to protect the privacy of the customer, the Bidder may black out the customer's name and personal information on the invoice submitted to Canada);
  2. a signed contract between the Bidder and an individual qualified (based on the qualifications described in this bid solicitation) to provide services under a resulting contract where the amount payable under that contract by the Bidder to the resource is equal to or less than the price bid;
  3. a signed contract with a subcontractor who will perform the work under any resulting contract, which provides that the required services will be provided at a price that is equal to or less than the price bid; or
  4. details regarding the salary paid to and benefits provided to the individuals employed by the Bidder to provide services, where the amount of compensation, when converted to a per diem or hourly rate (as applicable), is equal to or less than the rate bid for that resource category.

Once Canada requests substantiation of the prices bid, it is the sole responsibility of the Bidder to submit information (either the information described in the examples above, or other information that demonstrates that it will be able to recover its own costs based on the prices it has proposed) that will allow Canada

to determine whether it can rely, with confidence, on the Bidder's ability to provide the required services at the prices bid, while, at a minimum, recovering its own costs. Where Canada determines that the information provided by the Bidder does not demonstrate the Bidder's ability to recover its own costs in providing the prices bid, Canada may, at their sole discretion declare the bid non-compliant.

## **7.0 MANDATORY CLAUSES**

- 7.1 Where the words “**must**”, “**shall**” or “**will**” appear in this RFP, the clause is to be considered as a mandatory requirement.

Bidders should make the request to the Contracting Authority within the timeframe specified in the contract award notice. The debriefing may be in writing, by telephone or in person at the discretion of the Contracting Authority.

## **9.0 OFFICE OF THE PROCUREMENT OMBUDSMAN**

Should any part of the Work whether it be a report, document, good or service not be in accordance with the Contract or not be done to the satisfaction of the Canada, as submitted, Canada will have the right to reject it or require its correction at the sole expense of the Contractor before making payment.

5.2 The Contractor will be in default of the Contract if the Work is rejected by Canada or if he fails to correct the Work within a reasonable delay.

#### **GC6. Amendments and Waivers**

6.1 No design change, modification to the Work, or amendment to the Contract shall be binding unless it is incorporated into the Contract by written amendment or design change memorandum executed by the authorized representatives of Canada and of the Contractor.

The notice shall state the cause and circumstances of the delay and indicate the portion of the Work affected by the delay. When requested to do so by the Minister, the Contractor shall deliver a description, in a form satisfactory to the Minister, of work-around plans including alternative sources and any other means that the Contractor will utilize to overcome the delay and Endeavour to prevent any further delay. Upon approval in writing by the Minister of the work-around plans, the Contractor shall implement the work around plans and use all reasonable means to recover any time lost as a result of the excusable delay.
- 8.3 Unless the Contractor complies with the notice requirements set forth in the Contract, any delay that might have constituted an excusable delay shall be deemed not to be an excusable delay.
- 8.4 If an excusable delay has continued for thirty (30) days or more, Canada may, by giving notice in writing to the Contractor, terminate the Contract. In such a case, the Parties agree that neither will make any claim against the other for damages, costs, expected profits or any other loss arising out of the termination or the event that contributed to the excusable delay. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.
- 8.5 Unless Canada has caused the delay by failing to meet an obligation under the Contract, Canada will not be responsible for any cost incurred by the contractor or any subcontractors or agents as a result of an excusable delay.
- 8.6 If the Contract is terminated under this section, Canada may require the Contractor to deliver to Canada, in the manner and to the extent directed by Canada, any completed parts of the Work not delivered and accepted before the termination and anything that the Contractor has acquired or produced specifically to perform the Contract. **FIELD TRIALS FOR EVALUATION OF PRODUCTS TO CONTROL POTATO EARLY DYING (PED) IN POTATO****1. BACKGROUND:**

The Morden Research and Development Centre, Integrated-Crop-Production-Systems Program is looking for mechanisms to reduce the severity of Potato Early Dying (PED) and increase potato productivity and profitability. PED is a major yield-limiting disease in all major potato production areas of Canada. The disease is mainly caused by the fungal pathogen *Verticillium dahliae*, but co-infection of potato by both *V. dahliae* and the root lesion nematode, *Pratylenchus penetrans*, can greatly increase the severity of the disease. Control strategies are generally limited to chemical fumigation, with products like the soil fumigant Vapam (Sodium Methan; an AMVAC product). Control products have become available to producers to control PED, the new fungicides ELATUS (Solatenol and azoxystrobin; a Syngenta product), the biological fungicide SERENADE SOIL (QST 713 strain of *Bacillus subtilis*; a Bayer product), and the nematicide with secondary fungicidal properties VELUM PRIME (Fluopyram; a Bayer product). The efficacy of these products alone or in combination is uncertain. A key component to determine the effectiveness of pest control products to manage this disease is conducting multiple research experiments on naturally infested fields with high levels of *V. dahlia* in Canada.

To meet our research goals we need to conduct evaluation trials of the control products in heavily infested and poorly producing potato fields dedicated to processing potato production. These fields are not currently available near our research facility, and AAFC doesn't have the specialized equipment and certified personnel necessary to evaluate soil fumigants. Entering into a Contract for these services will enable AAFC to determine the efficacy of disease control products on *Verticillium* spp suppression, disease symptom reduction and yield improvement under different soil and weather conditions.

**2. OBJECTIVE:**

AAFC requires the services of a Contractor to conduct research trials to examine the potential to control PED through fungicide/nematicide and soil fumigant products in heavily *Verticillium* spp infested and poorly producing potato fields.

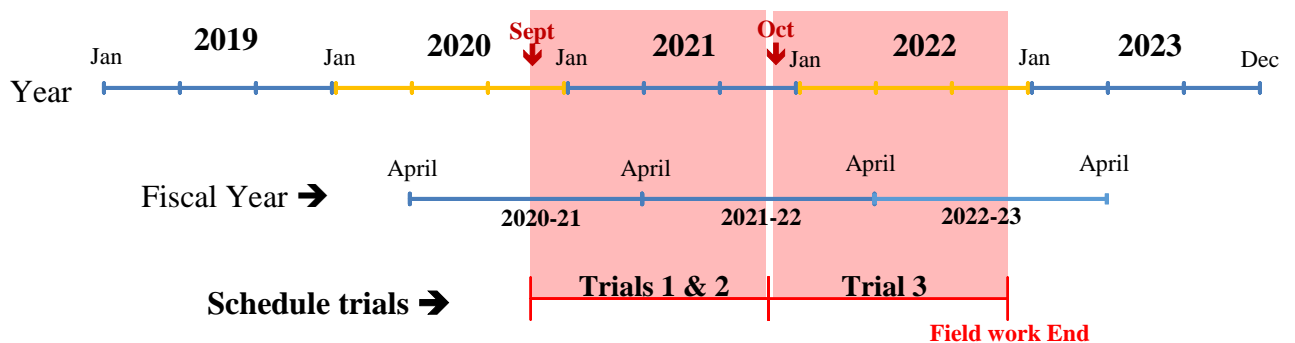

**3. SCOPE OF WORK:**

The Contractor shall conduct three replicated plot trials of the disease control products on three field sites located in Manitoba. There will be two trials during the first year (2020-21) starting in fall 2020, and seeded in spring 2021, and one trial in the second year (2021-2022) starting in Fall 2021 and seeded in spring 2022. Trials shall not be located on the same field each year.

### 3.1. Evaluation Trials:

#### 3.1.1. Field Timeline:

#### 3.1.2. Control Products:

Contractor is responsible for obtaining and providing the required products.

- VAPAM, Soil fumigant (Sodium Methan; an AMVAC product). Apply in fall.
- ELATUS (Benzovindiflupyr; a Syngenta product), apply in-furrow at planting.
- SERENADE SOIL, biological fungicide (QST 713 strain of *Bacillus subtilis*; a Bayer product), apply in-furrow at planting.
- VELUM PRIME, nematicide with secondary fungicidal properties (Fluopyram; a Bayer product), apply in-furrow at planting.

#### 3.1.3. Treatments:

- T1. Untreated Control
- T2. VAPAM
- T3. VAPAM + ELATUS
- T4. VAPAM + VELUM PRIME + ELATUS + SERENADE SOIL
- T5. VELUM PRIME
- T6. ELATUS
- T7. VELUM PRIME + ELATUS
- T8. VELUM PRIME + SERENADE SOIL
- T9. VELUM PRIME + ELATUS +SERENADE SOIL

Treatments will be applied according to manufacture recommendation.

Soil fumigation treatment (T2, T3 and T4) will be applied in fall previous to the potato production year.

#### 3.1.4. Site Selection:

Sites must be established on naturally infested fields with high levels of *Verticillium spp.* The Contractor is responsible for finding the fields. In the case, that sites are being established on a farmer's fields, contractor is responsible for engaging with the farmers. Site must be selected in Manitoba fields, with history of potatoes, particularly the processing potato cv. Russet Burbank. The Contractor shall submit a Site Location Plan for approval to AAFC before starting the work. This plan shall include a detailed description of the land including rural municipality, legal land location, GPS location and land history information (See Item 3.1.7.6 herein).

### 3.1.5. Replications:

The experiment has to be replicated four times at each site location. Each block (or replicate) must have all nine randomly distributed treatments. Each experiment at each location has to have four blocks (or replicates), for a total of 36 plots (four plots per treatment).

### 3.1.6. Experimental Design:

Randomized complete block design with four replications. In this experimental design, the experimental units (plots) are grouped into block or replicates (blocked) in a way that minimizes the variability among the plots within blocks. Each block contains a complete set of the nine treatments. The treatments are assigned within the individual blocks at random with a separate randomization for each block.

Plots should remain close with alleys separating the blocks. Blocks should not be spread over a large area to avoid a soil variability effect.

### 3.1.7. Methodology:

- 3.1.7.1. Preliminary soil chemical sampling: soil sampling is required before experimental set up at each site location. One soil sample from 0-12 in depth and one soil sample from 12-24 in depth. Each sample is composed of 10 core samples collected randomly from the whole trial area at each site. Samples shall be sent for analysis to a recognize laboratory, either Agvise or FarmersEdge laboratory are acceptable for a complete analysis.
- 3.1.7.2.
