This amendment 01 is raised to provide answers to questions received from respondents:

QUESTIONS / ANSWERS :

Q.01: Do the interim-capability COSPAS-SARSAT requirements on RFI p4 relate only to Alert Messages as described at <http://www.cospas-sarsat.int/images/stories/SystemDocs/Current/A002-MAY-2020.pdf>?

A.01: Yes, only COSPAS-SARSAT alerts as described in the A002 document must be part of the solution. Note that since the A002 document could be updated up to twice per year, the proposed solution should be easily updatable in order to maintain compatibility with the COSPAS-SARSAT messaging format.

Q.1.1: Are the Alert Messages only as received from CMCC or USMCC?

A.1.1: Yes.

Q.1.2: Does Canada require the desired solution to interoperate with COSPAS-SARSAT directly, or does Canada have the capability/interest to deliver Alert Messages to the desired solution via proxy (which may include aspects of Canada's legacy command and control and logging software currently used to support the National SAR Program)?

A.1.2: This question is a little unclear. The interim solution should only receive COSPAS-SARSAT messages directly from the active CMCC/USMCC server as applicable. If this answer does not adequately answer the question, or if a different solution is suggested/recommended, please re-phrase the question.

All other terms and conditions remain unchanged.
