Annex A – Specifications (Revision 1)
For the purchase of one (1) Western Star 5700 XE Class VIII Tractor
for Transport Canada

Project Overview

Transport Canada (TC) has a requirement for the supply and delivery of one (1) current production class VIII tractor equipped with Electronic Stability Control, Wabco OnGuard radar collision avoidance/mitigation system, lane departure warning and Adaptative Cruise Control.

A bid must clearly indicate compliance or non-compliance with each of the items below by inserting Yes or No under the Compliance Column. The vehicle must have less than 160 km or as delivered from the manufacturer (some vehicles must be driven from the manufacturing plant, in that case, as-delivered mileage will be accepted). At delivery, the New Vehicles Information Sheet (NVIS) and Sales Contract must only list Transport Canada as the first retail owner.

To ensure compliance is clear, the Bidder should utilize the numbering system that corresponds to the numbering system below.
