### Amendment 002

This amendment is raised to answer question(s) received from the Industry and revise the solicitation.

#### 1. QUESTIONS AND ANSWERS

**QUESTION 1:** Can the government specify the make or model of a product that has adjustable blast frequency while also filling all other requirements, specifically remote activation (reference Annex A, 4.15 MMPS14.7) that is currently on the market in Canada or elsewhere? Or is the government simply viewing all possible options across all manufacturers and suppliers and assuming that some sort of hybrid could be provided?

**ANSWER 1:** In response to the above question, Canada has decided to remove MMPS 14.12 from Annex A, 4.15 Propane Cannon and Tripod.

**Delete in its entirety:** 4.15 PROPANE CANNON AND TRIPOD

**Insert:** 4.15 PROPANE CANNON AND TRIPOD

Product Description		Quantity
A propane cannon and tripod with a timer and remote controller, suitable for deterring wildlife within a 2 hectare area.		1
Item No.	Minimum Mandatory Product Specification	
MMPS14.1	The propane cannon must be capable of repelling birds within a 2 hectare area.	
MMPS14.2	The propane cannon must be powered without the need for an external power source, e.g. by disposable batteries and/or a solar cell. If battery powered, a single set of spare batteries must be included with each unit.	
MMPS14.3	The tripod must allow the cannon to rotate 360 degrees about its vertical axis.	
MMPS14.4	The propane cannon must rotate about its vertical axis with each detonation.	
MMPS14.5	The tripod must have a means of securing the base to maintain a fixed upright position.	
MMPS14.6	The tripod must be collapsible to facilitate stowage within the provided carrying case.	
MMPS14.7	The propane cannon must include a timer to activate factory-set programs.	
MMPS14.8	The propane cannon must include a remote controller to activate the cannon from a minimum distance of 180 m.	
MMPS14.9	The propane cannon must include all hoses and fittings to connect a standard portable propane tank (QCC-1 connector).	
MMPS14.10	The propane cannon must have a minimum of two factory-set random fire modes including a fast multi-shot capability.	
MMPS14.11	The propane cannon must produce a minimum blast intensity (sound pressure level) of 120 dB at a distance of 1 m from the cannon.
