Questions and Answers:

1. Specifications

- o. iii. The system must have a safety alarm that alerts personnel that the system is in operation

Our Rotary Lift mobile column has an audio alarm when the lift is descending but not when it is ascending.

Q1: Is this acceptable?

A1: Yes

"The system must have attachments that are compatible with wheels of a diameter between 31.5" and 49".

Our product can handle wheels with rim diameters from R12 to R22.5.

Q2: Would this be acceptable for this tender?

A2: When we specked 31.5" to 49" we are referring to the tire diameter. They are refereeing to the rim diameter and does reflect the profile of the tire. The road grader has 26" rims but with large diameter tires which is why we specked tire diameter and not rim diameter. The hoist must have the capability to lift large diameter tires.
