OPENING DESCRIPTION

1. OPENING of dimension up to 1200mm x 2400mm for condition review of wall masonry and steel members.
2. Dismantle selected existing scotch bond facing stones and brick backing to expose steel members. Salvage masonry units for reinstatement in the same location.

The selected AREA location targets areas of deterioration observed during the exterior review. This AREA present signs of significant efflorescence and apparent rust staining. Moreover, multiple cracked/open joints and interior plaster damage relating to water infiltration were observed in the area on the North façade. Refer to the Urgent Work Memo.

OPENING DESCRIPTION

1. OPENING for condition review of masonry wall assembly. Align OPENING with corresponding interior OPENING.
2. Dismantle selected existing scotch bond facing stones to expose brick backing. Salvage masonry units for reinstatement at same location.
3. Dismantle 4-5 facing stones except at the buttress. Salvage masonry units for reinstatement at same location.
4. At buttress, perform 610mm X 610mm OPENING. Dismantle selected facing stones on buttress face, buttress return, and adjacent masonry wall. Salvage masonry units for reinstatement at same location.
