Solicitation Amendment 004 is raised to answer bidder questions:

Question 1: Due to the COVID-19 pandemic, lodging and isolation is an issue. We would propose a camp to be moved to a dedicated site to be isolated and be self-sufficient. Do you have a dedicated camp site location?

Answer 1: There are no dedicated camp site locations for this project. Per the contract specifications, construction camps will not be permitted within PSPC's right of way or other lands owned or leased by PSPC. However, the Contractor may propose a location plan for PSPC's consideration.

Question 2: Is there a government source for rip rap?

Answer 2: PSPC's quarries, which are accessible from the Alaska Highway at Km 888 and Km 651 (Wood Creek), will be made available for the Contractor's use on this project, if requested. The quantities and size of the riprap currently available at these quarries are unknown. Should the Contractor decide to use these quarries, any available riprap material will require sorting. If the available riprap is insufficient in quantity or size, blasting will be required to produce the required riprap material. A detailed blasting plan must be submitted by the Contractor and approved by PSPC prior to undertaking any blasting in PSPC's quarries. The Contractor shall be responsible for obtaining all necessary blasting permits and all cost associated blasting costs.

Question 3: Is there a site for waste, i.e. garbage and culvert debris?

Answer 3: PSPC does not have a waste disposal site for this project. There are offsite facilities to dispose waste, including culvert debris, accessible from the Alaska Highway both north and south of the project site.

Question 4: Is there a site for creosote material?

Answer 4: PSPC does not have a waste disposal site for creosote contaminated material for this project. Privately owned waste disposal facilities will accept creosote contaminated material and are accessible from the Alaska Highway.

All other terms and conditions remain unchanged.
