

Q11. Will National Defence Canada accept a RFP submission for a AIT management software solution that requires and includes DND SAP-based ERP system integration that will be developed and implemented by the bidder and in partnership with the DND ERP support team?

A11. DND is looking for an autonomous AIT management solution that can meet the requirements of the RFP without the use of the DND ERP system. Any integration to the DND ERP would occur at a later date (following the AIT's complete installation).
