## Solicitation Amendment 05

This solicitation amendment is raised to answer bidders' questions and to make changes to the Statement of Requirement (SOR).

**Q1)** I am working through this solicitation and would like to clarify line:

1.1.1 Metal Locker must be pre-painted in a grey finish

Does this mean the lockers are to be left in a primer for painting after installation? Or does it mean that it is to arrive on site as a painted assembly. I currently understand this to be the former, where the welded assemblies would arrive with their zinc primer coat ready for in-situ painting. Thank you.

**A1) Lockers must be painted prior to shipping to RCMP.**

**Q2)** There is quite a few questions regarding the "pre-painted material". I assume that the intent is to have all the parts bolted/riveted in place and preprinted so replacement parts can be acquired.

The term pre-painted in the industry usually refers to gauge material painted at the mill by the coil, it is usually very difficult to find any gauge above 22. We would like to have 16/22 gauge components in our submission, if we powder coated all the parts prior to assembly would that satisfy the pre-painted specification?

**A2) Powder coating will be acceptable. Please refer to change in statement of requirement as per below.**

**As for gauge, refer to solicitation amendment 01, where requirement 1.1 was already revised. No further change to requirement.**

### **Annex A: Statement of Requirement (Changes)**

#### **Delete**

1.1.1 Metal Locker must be pre-painted in grey finish

#### **Insert**

1.1.1 Metal locker must be pre-painted in grey finish or powder coated to a smooth finish.

**\*\*Please note that no more questions will be answered.**

***All other terms and conditions remain unchanged.***
