

This amendment **02** to Solicitation **2R008-20-0093** is raised to address the following:

Time Extension:

We are extending the closing date of this tender to Friday, November 6, 3pm EDS.

Questions and Answers:

Q1: Can you provide the Auto CAD file for this requirement?

A1: Yes, we have it available upon request, as the file format cannot be attached to the tender. Please request at Procurement.Achats@priv.gc.ca

Q2: What is the desired height of the frosted glass portion of the panel matrix?

A2: 12".

Q3 : Instead of 4-ways top feeds in inclusion to the glass above panels will you accept 2-way, 3-way or end of run?

A3: We will also accept 3-way inclusions

Q4: Would it be possible to flip the location of the return surfaces? Currently on the drawing, you show the 24"D x 72"W surface hanging off a 48"W panel, however by swapping the location of the height adjustable table, and the return surfaces, the client would save on components parts are we could simply install the surface with brackets instead of adding legs.

A4: We wish to have free standing all over no hanging off any partitions.

Q5: Are the lockers in the floor plan part of this request for bid?

A5: No, we are not acquiring the lockers as part of this solicitation.
