

Q&A Round 1 – RFP 20-58061 Health and Safety e-Learning course content

English/Anglais:

Q1: In section 1.4 Scope of Work, it is requested to provide access to the tutorial editing tool within two weeks of confirmation of selection. However, we use the Articulate Storyline 360 authoring tool for our training titles. Should we pay the licence fees for this software from you or just let you know which tool we use so that you can get the licenses from your end?

A1: If the authoring tool is not owned by the bidder, but licensed to a third party, the proposal must include the name of the authoring tool used and the cost to the bidder. This cost will be used for evaluation purposes, but the NRC will procure the licence on its end if the bidder is selected.
