Description of Work:

The Department of Industry (also known as Innovation, Science and Economic Development (ISED) Canada) has a requirement for a Programmer/Analyst Level 3 to support the various Digital Services Division projects and initiatives in the development of Java applications.

Duties and deliverables may include but not be limited to the following:

- Analyze user requirements to determine system features and functionality;
 - Drive best practices, quality and consistency within the design and development phases;
 - Follow ISED application life cycle methodologies, timelines and project plans;
 - Present application demos to stakeholders as required;
 - Design, develop, test, deploy and enhance web-based Java applications using application servers;
 - Perform test-driven development using tools such as JUnit;
 - Identify production and non-production application issues;
 - Troubleshoot and bug fix in Java applications;
 - Use an issue tracking system such as JIRA;
 - Produce and maintain documentation and procedures for systems and/or applications as per ISED's standards and guidelines and legislative requirements;
 - Transfer functional and technical knowledge to ISED employees on an ongoing basis throughout the life of the initiatives/project(s);
 - Complete and submit, for weekly approval, time sheets by project using the (in-house) Project Tracking System; and
 - Provide updates/status reporting to project team management as required.
-
- Bidders must submit a bid for all resource categories
 - There are NO contractors performing the services described in this RFP.
