AMENDMENT 001

Amendment 001 is being issued to address the following questions:

Question:

Can you please clarify the Material specification of the transparency?

Answer:

The required window material is aircraft-grade acrylic.

Question:

Can you please confirm that the material thickness is 0.250"

Answer:

The required acrylic window material is 0.25 inches thick.

Question:

Please confirm the Geometric Tolerances

Answer:

The two forward bubble windows must fit within a removable frame that fits into the standard Emergency Exit window opening of a Twin Otter 300. The right rear bubble window must fit within a door frame that fits into the right rear Emergency Exit door opening of a Twin Otter 300. The depth (protrusion) of the windows must be equal to or greater than DFO's current bubble windows and door, which is 9" and 10 inches, respectively.

Question:

Please clarify the Transport Canada Approval and certification requirements?

Answer:

As expected of an experienced fabricator, we require that the successful bidder make arrangements to have Transport Canada certify the bubbles windows and bubble door as legal to be installed on a Twin Otter 300, and used during DFO's aerial surveys. Previously, this has required load tests with weighted sandbags to test the strength of the window/frame installation. There may be other tests required by TC which are up to TC's discretion, such as a test flight after window installation in the Otter (DFO will to pay for the flight time for that test, if it is required).

***ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED ***
