PROJECT TITLE: Development of enabling space technologies

The purpose of this amendment is to answer a question received.

Question and answer:

Question 1:

For Priority Technology 3: Enabling Technologies for the Exploration of New Worlds – technologies for future payload opportunity

Under Scope of Work, Page **A-72**, it states: "This technology development opportunity addresses **optical and related technologies** including: optics, active optics, sensing, imaging or non-imaging detectors (including but not limited to: Near Infrared (NIR) to near UV, any format, high speed, high efficiency), readout electronics, elements of spectrometers and or polarimeters. The technology proposed must be demonstrated as leading to or required for future exoplanet science from space"

Would a proposed project developing a platform (i.e. a stratospheric balloon gondola) for testing, validating and flying such optical systems in the Stratosphere that will not be developing the optical or sensing technologies described, but rather a transportation system for bringing these technologies to high altitude, which is required for exploration of new worlds from space qualify under the Statement of Work of this Priority Technology?

Answer 1:

This technology development opportunity addresses **optical and related technologies**. A proposal that solely address the development of a platform would not fit the Scope of Work defined for this Priority Technology.

ALL OTHER TERMS AND CONDITIONS OF THE RFP REMAIN UNCHANGED
