2 - TECHNICAL EVALUATION - POINT RATED TECHNICAL CRITERIA – STREAM B

Only those arrangements which first meet the Mandatory Requirements will be considered in the second stage of the evaluation, the Technical Evaluation.

To be considered responsive, an arrangement must obtain a minimum passing mark of 80% overall for the Stream B point rated criteria of the Technical Evaluation. Arrangements scoring less than 80% overall for the point rated criteria of the Technical Evaluation will not be given further consideration.

Suppliers are instructed to address each requirement in sufficient depth to permit a complete analysis and assessment by the Evaluation Team.

Arrangements will be evaluated on the completeness and level of detail by which they address the rated requirements. For example, if a description of a process or procedure is requested the various steps which the Supplier will perform in order to complete the requirement, as detailed in the Annex A Statement of Work, should be described.

General statements should be avoided. These do not provide details which can be compared to the description of the requirement, and therefore evaluated as to their relevancy in fulfilling the requirement, as detailed in the statement of work.

Assessment of arrangements will be based solely on the information in the Arrangement. Canada may seek further information or clarification from the supplier.

The points allocated for selected criteria will be multiplied by the specified weighting factor (w.f.).
