Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the question(s) or may request that the Bidder do so, so that the proprietary nature of the question(s) is eliminated, and the enquiry can be answered to all Bidders. Enquiries not submitted in a form that can be distributed to all Bidders may not be answered by Canada.

ANNEX "A" REQUIREMENT

The Department of National Defence has a requirement for the supply and delivery of one (1) complete Tire Changing Machine.

1. Background

LSS Base Maintenance at CFB Kingston, is an organization within the Department of National Defence. Base Maintenance is mandated to inspect and repair a large, diverse wheeled fleet. Our tire repair shop is currently using outdated machinery with very limited capacities, unable to meet the wide array of equipment it must support at CFB Kingston. This raises issues with the technicians who are operating this machine, sometimes resulting in damage to the equipment they are trying to repair.

Tire changing is a basic skill set for the automotive technician. We require a modern tire changing machine that is reliable and meets the industry standard to train our apprentice technicians without any risk of personal injury or damage to equipment. We also have technicians with mobility limitations, requiring assisted tire lift capabilities to also further reduce risk of injury, reducing the loss of much needed technicians.

2.0 GENERAL REQUIREMENTS

2.1 Documentation

The Contractor must provide at the time of delivery, in hard copy or electronic format in English, after-sales services, Maintenance and Operator Manuals containing the latest technical information related to the tire changing machine as follows:

- 2) Operator manual: must provide all necessary instruction for the safe operation of the equipment, including a detailed description of all available features and how to use them; and
- 3) After-sales services: must include specific warranty coverage details and contact information for service.

Note: A Canadian French version of the documentation is desirable, but not mandatory.
