Q&A 2

**Q1:** In regards to the answers posted this morning on B&S:

A1: "...not shelving that is for storage but for structural purposes. ( See sketch for reference)".

The product we are proposing does not require additional support for structural purposes and the sketch included in the bid document does not indicate an additional shelf. Please advise.

**A1:** No shelving will be needed in the double and triple locker. Hooks need to be provided otherwise!
