The following changes to the tender documents are effective immediately. This amendment will form part of the contract documents.

Amendment 002 is issued for the following:

(1) To provide Questions and Answers

Questions and Answers

Question 03

is it a single span boom from anchor A to Anchor C (Figure 3 of SOW)? or it has two spans from A to Buoy and Buoy to C? in this case we need to know the strength of the existing buoy/mooring.

Answer 03

As detailed in section 4.6 of SOW at least one in-channel anchor is required for the two span boom. New anchor should be located in a manner for boom to form more of a 'V' shape to promote self-rescue (for example a swimmer caught in the boom can reach the shore more easily). See section 4.8 of SOW for use of existing buoy integral to waterway barrier.

Question 04

What is the water depth at the location of the boat gate? What is the max beam and draft of the crafts pass from the gate?

Answer 04

Provide a gate to accommodate a boat with a maximum beam of 2.44 m and draft of 0.8 m. Provide gate in approximately same location as shown on Figure 3 of SOW as water depth is sufficient in this location (approximately 1.5 m when the lake is at its minimum level).

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME
