

Q&A 2

Q1: Annex A 7.1) Some numeric keypads locks include an integrated handle. Please confirm if a keypad with integrated lock includes a handle, that an additional handle is not also required.

A1: Please provide keypad lock with handle and no need for additional handle since the keypad will act for both In this case.

Q2: Annex A 7.1) Given that each cubby is nominally 24"h, there is little room to place footwear inside these units if other personal items are also stored inside. Please remove the requirement for a plastic boot tray.

A2: Keep plastic boot tray in description since it needs to be provided but no adjustable shelving is needed for the double or triple day-locker

Q3: Please confirm that it will be acceptable to provide a unit without a door frame as long as it meets all other BIFMA requirements.

A3: Doorframe made with 16 gauge needs to be provided and it is not acceptable to have a unit without doorframe

Q4: Annex A 7.7) It appears as if this requirement is referring to a piano hinge. Contemporary construction usually uses euro-style hinges that allow for adjustment/levelling of doors as well as a wider opening angle. Please allow euro-style hinges to be offered.

A4: No euro-style hinges can be provided. The hinges need to be made with 14 or 18 gauge with joints as requested in the document.
