**This amendment has been raised to answer the following questions:**

**Q7:** Will ice be a factor?

**A7:** Yes in some of the areas.

**Q8:** Can you please provide a KML/KMZ or shapefile for the area to be covered?

**A8:** No. There are a lot of areas and we will prioritize them based on the quotes per km2. Below are maps of the areas we tasked in the Canadian Arctic, as well as Clearwater Fiord, and Scott Inlet, to give you an idea, but we will be prioritizing areas to be read.

**Q9:** Are the Satellite scenes collected at the same geometry?

**A9:** Yes.

**Q10:** What are the approximate viewing angles?

**A10:** Unknown and probably variable.

**Q11:** Will the WorldView imagery include the 8 Multispectral bands?

**A11:** No.

**Q12:** Is there any SWIR image data collected?

**A12:** No.

**Q13:** Can you inform any accuracy requirements you have?

**A13:** We know that there is the requirement to check accuracy and we can provide an estimate, but it would be good to know what, if any, requirements they have for this figure to be. Accuracy should be  $\geq 90\%$ .

**Q14:** The delivery deadline of March 31st is fairly soon, is it possible to extend the delivery date?

**A14:** No.

**Q15:** To satisfy this criterion M3, would PWGSC / DFO allow the bidder to present experience reading (interpreting) aerial photos having a scale equivalent to satellite images (30-40 cm resolution)?

**A15:** Yes but the bidder must demonstrate at least one experience reading satellite imagery for cetaceans or other wildlife.

**Q16:** Also in criterion M3, please clarify the meaning of "The bidder should provide reference to analyses for which they conducted the reading". Does this simply refer to a description of the methodology employed.)?

**A16:** Publications/reports where the results of analyses for which they conducted the reading are described should be provided.

**All other terms and conditions remain the same.**
