This amendment 001 is raised to answer the following questions from industry and amend Solicitation 5K003-200737/A as follows:

Question 1:

Item 2.4 – We offer stainless steel for the interior of the freeze dryer, is this sufficiently corrosion resistant, or is PTFE preferred?

Answer 1:

Yes, stainless steel for the interior of freeze dryer would be acceptable.

Question 2:

Item 2.6 – The shelves are 16.5" wide x 12" deep instead of 10.5" x 19". In terms of area, it is equivalent. Is this acceptable?

Answer 2:

No, this will not be accepted as it would be too shallow for our purposes. The dimensions would limit the size range of containers, which are method specific, therefore increasing the number of runs required.

Question 3:

Item 2.8 – The shelf temperature range is -40C to +40C instead of -45C to +45C, is this acceptable?

Answer 3:

No this will not be accepted.

Question 4:

Item 2.14 – A rotary vane pump is generally suitable for working with aqueous based solutions. Is this acceptable or is a 2-stage combination pump with PTFE coated interior preferred?

Answer 4:

Yes, a rotary vane vacuum pump would be acceptable.

Question 5:

Regarding FOB destination, does the customer need unpacking and removal of debris? Are there any stairs involved?

Answer 5:

The unit will be uncrated by a 3rd party and moved to the 13th floor where it will be ready for installation by the vendor.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME AND IN FULL EFFECT.
